this is a reproduction of a book published before 1923 this book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process we believe this work is culturally important and despite the imperfections have elected to bring it

back into print as part of our continuing commitment to the preservation of printed works worldwide we appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book

the science and technology of cement and other hydraulic binders covers the design of portland cement composition using the ideas and formulae of earlier scientists including the calculation of proportions of different cement phases formed during processing other chapters cover cement manufacture by dry semi dry or wet processes using rotary and shaft kilns particular attention is given to the physical changes that occur in the raw mix when affected by chemical processes the chemistry of clinker formation which is concerned chiefly with high temperature reactions in the solid state phase or reactions in the presence of the liquid phase is also discussed users will find the latest information on the storage of cement its packing and handling hydration and setting gypsum different mineral additions and advances in special and newer cements including blended cements portland slag cement pozzolanic cements high alumina cements high strength cement based materials fiber reinforced cement non portland cements and lime covers raw materials cement design and manufacturing fuels used in manufacturing phase balances clinker training hydration and setting includes various types of cement mineral additions high strength cement and different cement based materials presents information on activated alkaline materials recycled cements and novel additions discusses future trends in cement manufacturing and the circular economy contains a high number of figures tables and reference data

excerpt from the concrete engineer s handbook a convenient reference book for all persons interested in cement plain and reinforced concrete building construction architecture concrete blocks mill building office building fireproof houses etc the publishers have not attempted in this work to produce a condensed cyclopedia covering the broad field of concrete engineering but they have aimed to present to the public a handy reference book convenient to carry in the pocket a pocketbook in reality and containing rules formulas tables and diagrams that are often used and needed by architects concrete engineers inspectors superintendents foremen carpenters contractors

draftsmen designers house owners and prospective house owners in fact every one engaged in any profession or trade connected with building of concrete or in any way interested therein the aim of the publishers has been to elect from the vast amount of material on hand only that portion which is most likely to be used in connection with daily work or which will be most frequently consulted although the treatment of some subjects is of necessity brief it has been the aim to so distribute the space available that it would cover the more important subjects as fully as possible it has been found impracticable to give tables for the strength of concrete beams and slabs because the stresses employed are subject to city regulations until the large cities adopt uniform requirements such tables cannot come into general use about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
